Vaccination Report

All Mares:

Tetanus/...../.....
EHV1.4/...../.....
EVA/...../.....
Influenza/...../.....

NB: All mares must be vaccinated against tetanus and influenza prior to arriving at Newton Stud, and their vaccinations must be in date. Mares must have a negative blood test (serology) for EVA within 28 days of arriving at Newton Stud and a negative CEM clitoral swab. Vaccination against EHV1.4 and EVA is optional for non-pregnant mares. Vaccination against EHV1.4 (pneumabort) is necessary for pregnant mares arriving at the Stud to foal down (please speak to the Stud Veterinary Surgeon).
